

Innovative Controls Corporation

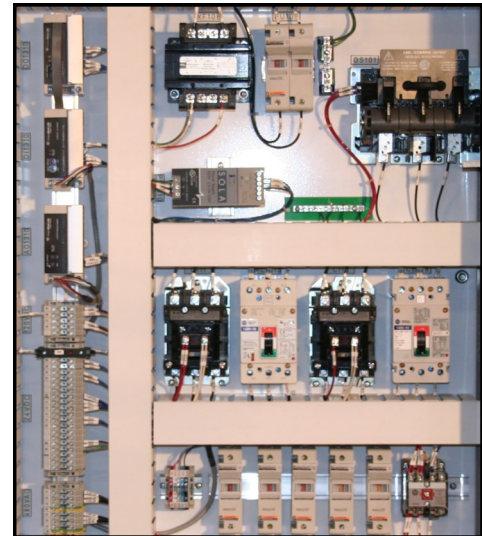

Company Profile

Since its formation in November of 1974, Innovative Controls Corporation (ICON) has designed and manufactured custom Electrical Control Systems for a broad variety of applications in many industries. Today, state-of-the-art ICON control systems are in use performing automated control and monitoring functions throughout the United States as well as overseas.

ICON is a full service engineering and control systems integrator and manufacturer. We have the capacity to offer complete turnkey services from concept to installation and start-up. Our design expertise will have the latest technology and products to suit you and your company. Many of our customers experience improved productivity, increased profitability and enhanced safety from our rebuild and retrofit services.

Innovative Controls has 41 years of industrial control expertise to serve your company's needs.
