SearchMonster

The Blade is offering **7 days free** to tryout SearchMonster for all Toledo Chamber of Commerce members who attend an information session with one of our recruitment strategists.

SearchMonster uses precision search technology to find the exact talent you need. Plus, you can manage and contact candidates via email or text message—all from the same interface. No more toggling from one platform to another. **SearchMonster** lets you do it all—find and reach the top-quality talent you need, when you need it.

DIG DEEPER WITH PRECISION TECHNOLOGY

You can start your search with broad criteria like job title, level, and location. Then use filters—like education, salary, relocation, citizenship, veteran status, and more—to widen or narrow the results.

SOURCE THE SKILLS YOU NEED MOST

We aggregate candidates' skill set information from various public platforms (GitHub, StackExchange, MeetUp, AboutMe), providing an even more comprehensive view of the applicants, derived from their web profiles.

GO BEYOND THE RESUME

You'll also gain access to candidates' public social profiles (Facebook, Twitter, LinkedIn, etc.) to see a fuller picture of their professional and personal interests, aggregated from their entire social footprint.

MESSAGE CANDIDATES DIRECTLY

You can connect with candidates right from the platform using text and email tools that are built into SearchMonster's easy-to-use three-panel interface.

GET REWARDED FOR PERFORMANCE

High-quality engagement is rewarded with increased email volume.

TRACK YOUR CAMPAIGNS

Built-in analytics help you analyze the performance of your campaigns and understand candidate behavior.
