

**A.A. Boos &  
Sons, Inc.**

# **Commercial, Industrial, Facility Service and Institutional General Contractor**

## **Small Company Big Results**

For over 65 years, A.A. Boos & Sons, Inc. has been in the business of building relationships and results. From our humble beginnings as a small masonry business, we have slowly but surely grown into a full service general contractor with our own direct labor force. As we have expanded our service menu, we have never neglected our commitment of ensuring intimate customer service, world-class safety and quality performance, and efficiency. Our flexible team oriented approach allows to follow our mantra of "any job, any size, anytime."

## **Industrial Commercial Institutional Construction**

Whether serving as General Contractor for new facilities or completing the smallest of maintenance tasks, everyone at A.A. Boos understands the unique needs and concerns of industry in our region. Whether it be an industrial, commercial, or institutional setting, we will build on our long-standing reputation of quality, reliability and safety in every job we do.

### **Talk to us about the following services:**

- Design/Build

# Your One-Stop Solution for Maintenance, Repairs and Upgrades

Sometimes, taking care of business means taking care of your current facilities. At A.A. Boos & Sons, Inc., our service personnel are skilled in multiple trades, and are available on a per-job basis or as part of an ongoing maintenance program. Our project managers can also arrange for periodic inspections of your facilities, working with your managers to develop a program of preventive maintenance adjusted for your priorities, schedules and budgets.

## We offer a broad range of maintenance services, including:

Concrete/Masonry installation or repair  
Carpentry  
Ironwork

We can also complete a safety or environmental audit of your facilities to identify any necessary upgrades for safety or environmental certifications. From complete facility rebuilds to repairing a single door, A. A. Boos can work with you to keep your business safe and well-maintained.

## Contracting is our Job, but Safety is Our Business

### Safety is the most important part of every job we do.

Our safety program consistently exceeds what is required or mandated, and includes:

- Intensive confined space training
- Extensive trenching and excavation training
- Fresh Air-qualified crews
- HAZWOPER-trained crews
- Equipment certified for work in unpredictable or IDLH atmospheres
- OQ-qualified crews for work on pipelines governed by the U.S. Dept. of Transportation
- e-Railsafe-qualified crews for work near CSX and Norfolk & Southern railways
- In-house sampling and monitoring capabilities for contaminants, noise and radiation

## Petrochem/Power Generation Service

Since 1946, A.A. Boos & Sons, Inc. has delivered a broad array of services for regional refineries and electrical generation facilities, with an emphasis on concrete structures, ironwork, petroleum storage and substations. Every A. A. Boos employee receives specialized safety instruction for their tasks, including confined space training, trenching and excavation training and fresh air qualification, all to ensure quality work and a safe work environment on every job we perform.
